

UMC - UNIVERSAL MINING CONTROL BOARD & FIRMWARE

Our *Universal Mining Control* board and firmware are tailored to the environmental condition of your facility and to your specifications.

Contact us on how to optimize your fleet.

PRODUCT FEATURES

Universal

- Compatible with all ePIC miners
- Tested and qualified with S19 XP and S19J families as well as M30 and M50 families
- Streamlines fleet management with a single control board & firmware

Perpetual Tuning

- ePIC *PowerPlay* technology to modulate frequency and voltage in real-time
- Underclocking/Undervolting to gain efficiency
- Overclocking to enhance performance
- Meets power curtailment requirements to automatically adjust frequency and voltage
- Fast response to minimize startup time and downtime.

*email us for more information

Immersion Ready

- Customizable fan control to fully disable fans in immersion
- Increase hashrate through full control over mining parameters

Customization

- FW customization based on fleet-specific considerations
- API to enable customers' specific features and management software

Management Tools

- Dashboard to manage individual miners and the entire fleet
- Compatible with major fleet management software
- Remote and automatic firmware update
